B - Changing The Thermostat :

- 1) Remove the lamp cover and unscrew the fixing screw.
- 2) Remove the screw cap and unscrew the fixing screw.
- 3) Remove the thermostat box by pulling it and disconnecting the wire connector.
- 4) Remove the thermostat knob by pulling forward. Loosen the nut fixing the thermostat.
- 5) Pull out the thermostat bulb from the housing.
- 6) Replace the thermostat with a new one and assemble the thermostat box following the steps backwards.

C - Thermostat Knob

- ✗ This knob is used to control the temperature of the freezer and refrigerator parts automatically. It can be set to any value between “0“ and “5“positions.
- ✗ “ 0 ” position indicates that the thermostat is “off”.The refrigerator is “off” on this setting.
- ✗ By turning the knob between “1” and “5”, you can increase or decrease the cooling degree.
- ✗ The refrigerator is designed to get optimum performance when the thermostat knob is set between position “2” to “4”.
